

NOTICE OF INTENT TO AWARD

Section 106 Supplemental Disaster Funding Request for Applications (closed 5/31/21)

The Virginia Department of Environmental Quality (DEQ) intends to award \$225,873 of Federal Section 106 Disaster Recover Funding. DEQ identified these projects via applications submitted in response to the 2021 Virginia Section 319(h) Nonpoint Source Implementation Program Request for Applications (RFA) that DEQ issued on 3/18/21. The applications were due 5/31/21.

The purpose of these grant awards is to support projects that will support installation of BMPs that will achieve pollutant reduction, flood mitigation and damage repair, along with technical assistance and outreach that support implementation of eligible TMDL implementation plans (IPs) and watershed-based plans within geographical areas declared as affected by Hurricane Florence. Eligible activities included in the above referenced applications will implement best management practices that address sources of pollution identified in implementation plans, flood mitigation, provide education and outreach opportunities, support pollution reduction activities, and strengthen ongoing implementation of implementation plans.

DEQ approved this NOIA on July 20, 2021 and posted to the [DEQ Nonpoint Source Funding website](#).

Section 106 Implementation Projects

Implementation Plan Watershed(s)	Applicant	Location	Funding Amount
Piankatank River, Gwynns Island, Milford Haven	Middle Peninsula PDC	Mathews County	\$120,000.00
Upper Roanoke River	City of Roanoke	City of Roanoke	\$105,873.00
			\$225,873.00
